

Beatons Group Chartered Accountants believe it is important to offer their clients' accounting services that utilise the latest 'Cloud' Internet technology. This gives businesses greater control and faster access to their financial data.

Beatons Group has teamed up with Online50 to provide internet hosted Sage Line 50 Accounts software.

"Using this technology can give a significant number of benefits to clients and enables us to create a stronger relationship with our clients and their business affairs"

## Key benefits of Online Accounting:

### 24 Hour access from anywhere

Provided you have a PC and can connect to the internet, you can access your accounting records at anytime, from anywhere so you can keep abreast of matters even when you are away from the office.

### Multi site, Multi user availability

If you have more than one office, or staff need to input data from different locations, they can all have access to a centralised accounts system, and view data simultaneously. Therefore there is no need to send documents between offices by post, thus saving your business, time and money.

### No software ownership worries

You only pay for the service on a monthly basis, with only one month's termination notice required. There is no need to pay for Sage cover as upgrades for the latest Sage Line 50 software are provided and the data is backed-up off site on your behalf, although it can still be backed-up locally if required.

### Greater support from your Accountant

We have remote access to your system. This will make problem solving of accounts queries much easier. We will be able to access your system from our office to view the problem, and advise you of the adjustments, or even correct them for you.

**No Software  
No Worries**

## No need to send year end back ups

With access to your system there is no longer any need to send us a back up of your accounts data. We can log into the system and access the trial balance and reports we need to prepare your accounts, meaning there is no disruption to the on going input of data by you and your staff.

We can also enter any opening balance adjustments directly into your system to ensure your records agree to the final accounts.

## Security

The Online50 service has been accredited with high levels of security equivalent to online banking.

At Beatons Group we believe this service will benefit many businesses regardless of size, allowing greater control over accounting processes, and with the comfort of knowing that their professional partners are on-line to provide technical assistance and support. As an alternative, businesses may wish to keep control of some accounting functions in-house, but outsource other functions that they do not have the capacity or expertise to undertake. We can provide this support using Online50 through our experienced and dedicated team who are especially assigned to financial outsourcing.

If you are interested in our online accounting services or outsourcing, please contact Nick Marshall for your free consultation.
