Reduce staff costs and business overheads

Imagine, never having to organise cover for staff holidays, sickness or maternity leave. Yet continuity of service guaranteed, always of the same high quality.

Think of your cost savings year on year when there are no salaries, overtime, pensions or associated staff overheads to pay. Outsourcing enables you to save on your end-of-year accounts costs too.

It really pays to look at this option for your business.

More time to refocus on your business

You'll find lots more time freed up to work on your business, when you have an outsourced team managing your daily book keeping, accountancy and management reporting.

You can refocus on all those other important business tasks, such as new product and service developments, networking and customer retention.

You'll free up office space too, since our team can be based here at our own HQ in Ipswich.

Guaranteed confidentiality and security

Keep at the leading edge of accounting developments. File and retrieve financial records easily while on the move, and in any location with an internet connection.

Using our secure cloud-based services you'll have direct access to all your files online and your records remain completely confidential. It reduces the security risks of commercially sensitive information being "leaked" or seen by unauthorised people.

Robust IT support and back-up procedures are provided to protect all your data.

Prevent fraud and reduce business risks

With more than 30 years in business, you'll find our qualified accountants have all the know-how to handle everything about your accounts, even the most complex issues.

Outsourcing prevents business risks such as internal fraud or employee error. It also reduces the chances of non-compliance and penalties for late filing; we have rigorous processes and checks in place.

BG Outsourcing commits to ensuring everything is completed accurately and in the time-scale agreed.
